

INTRODUCTION

Sakura is a registered business in the Philippines devoted to developing application services to provide ease in the lives of the people we are venturing into creating a decentralized ecosystem to provide solutions for the various inconvenience people are facing. With this objective, Sakura is driven by it's native token, \$AKURA. This token offers the community members two complementary options a store of value and a trading currency. \$AKURA token will be integrated within the ecosystem and can be used within our applications, Sakura Free Market and WeRide.

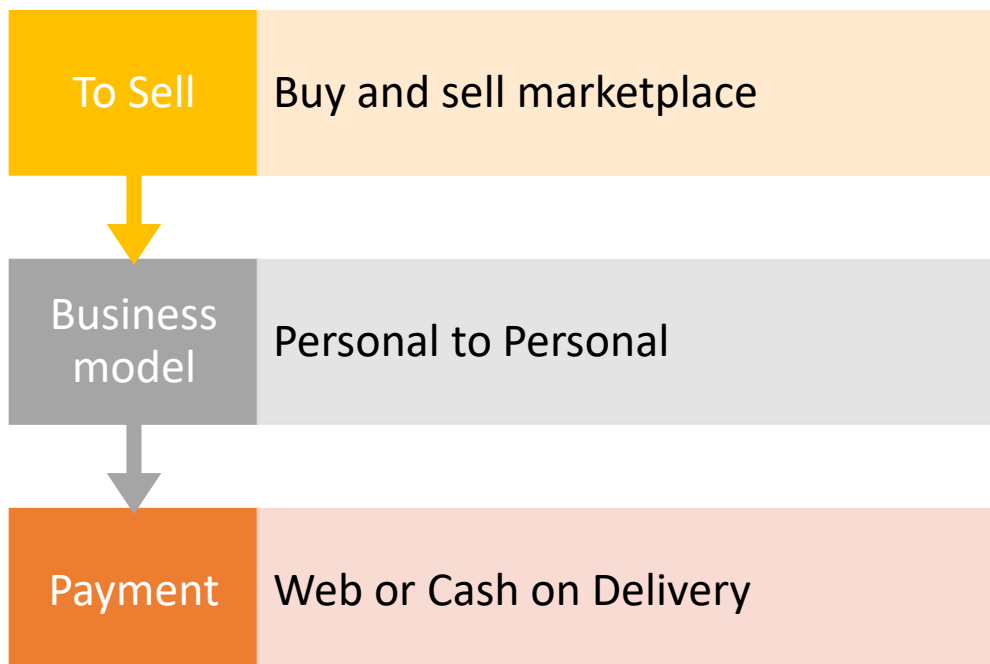

TOKENOMICS

The tokenomics of \$AKURA were designed to create trust within the community and establish an asset for storing value. The total supply of \$AKURA tokens is only limited to 10,000 tokens.

\$AKURA token is a token of the BEP20 standard on the Binance Smart Chain (BSC). The tokenomics of \$AKURA was designed to establish a low-cost option for trading.

BUSINESS MODEL

SAKURA FREE MARKET'S BUSINESS MODEL

The business mode of Sakura Free Market is explained as a Buy and Sell platform it is an entire P2P platform where people can buy and sell any legal items within the marketplace. A 10% commission is deducted to every successful transaction. People can freely register and use the platform anytime and anywhere. Individuals or people with small business can use the platform to start selling their products. There is no limit on how many products you can post and sell on the platform. We also partnered with third-party delivery services such as Lalamove and Mr. Speedy (only applicable to covered areas by the courier). For payment gateways, we also partnered with 2 of the leading e-wallet providers in the Philippines, Gcash and Paymaya.

Safe And Trustworthy Transaction for Everyone

- Seller can't receive money until buyers want confirm the received packages
- Once the RECEIVE button is clicked, money automatically goes to the seller. Hence, after 7 days of delivered status, money is sent automatically to the seller.
- E-wallet is secured from Block Chain Technology

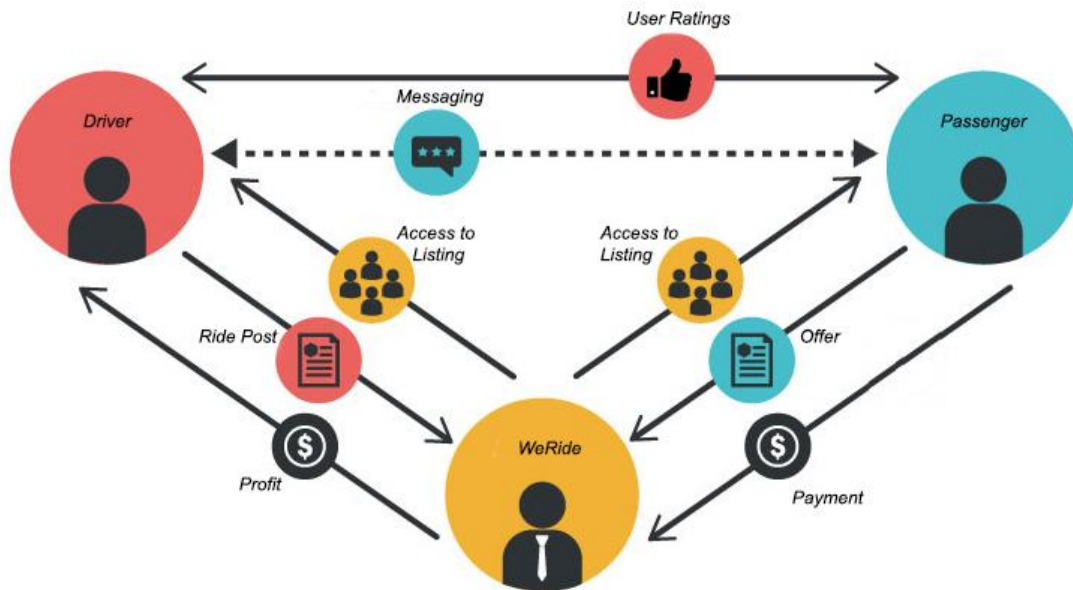

Flow of Safe Money Transaction

- Trade-In Safely
- Safe System
- Buyer surely receives the product
- Sellers receive money after transaction

Sakura's Strong Point of service

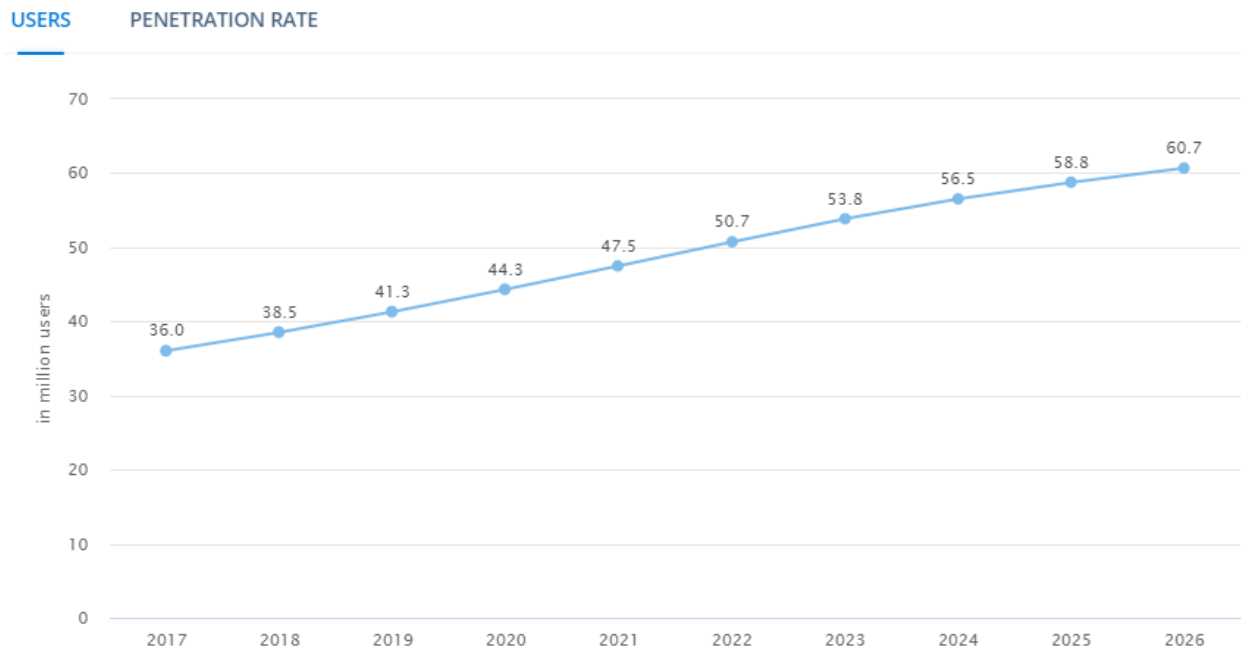

- No need for face-to-face meet-up.
- No business or legal documents needed
- to buy and sell your product
- Save money by selling the product you do not need
- Affordable price
- Cash On Delivery
- Sakura pick up and delivers the packages for you
- After transaction buyers will reviews seller's product

WERIDE BUSINESS MODEL

WeRide is an online long distance car sharing platform that connects vehicle owners with travelers and locals seeking to book vehicles for long distance trips.

Based on statistics, by the year 2025, it is likely over 45 million vehicles are projected to be in the global car sharing program. This stats conveys the popularity and demand of ride sharing services and thus, the platforms like WeRide.

Most recent update: Jan 2022

Source: Statista

How WeRide Works?

Car owners can use WeRide to share their long-distance transport with passengers traveling in the same direction. The route and pricing for the ride are specified by the owners. Interested co-travelers can communicate with the car owner via WeRide's private messaging system or by phone. The co-travelers then pay the car owner directly for their payment.

Economic Stability Model: How WeRide Generates Revenue?

Service charges, which are 10 percent of the overall cost of a ride, is how WeRide makes profit. While the platform connects drivers and riders who are traveling in the same direction, it ensures that riders only pay for charges as agreed by the two parties.

Payments can be made by online payment methods such as credit card, WeRide wallet, PayMaya and Gcash. Cash payments can also be done before or after the trip.

OPERATIONS

In the near term, \$AKURA has focused on developing applications and launching a data-driven marketing campaign. We will be listing \$AKURA token in BEP20 this first quarter of 2022. We will be also running targeted digital ads on different platforms and social media. Looking ahead, \$AKURA will capitalize on this near-term objective to establish a proper decentralized community for high quality services.
